

Case Study: Luxury Goods Store in Shopping Mall

THE SITUATION

A luxury goods store suffered a catastrophic flooding event which resulted in extensive damage to the storefront. This property loss required the utilization of a third party restoration company to perform mitigation and clean up services in order to restore the affected wing to its original state, prior to the flooding event in the shopping mall.

OUR SOLUTION

The luxury goods brand's insurance carrier retained NovaData-Solutions to audit and analyze the restoration company's invoices; utilizing both our industry and rate sheet adherence platforms. These audits resulted in the identification of 21%+ in financial anomalies within 48 hours of submitting the restoration invoices to NovaData-Solutions.

KEY BENEFITS

Faster Processing

Dramatically reduces invoice review time, bypassing Manual processes to review invoices that are slow, inconsistent, and expensive.

Greater Accuracy

Eliminate persistent inaccuracies and overcharges in bills for property mitigation services.

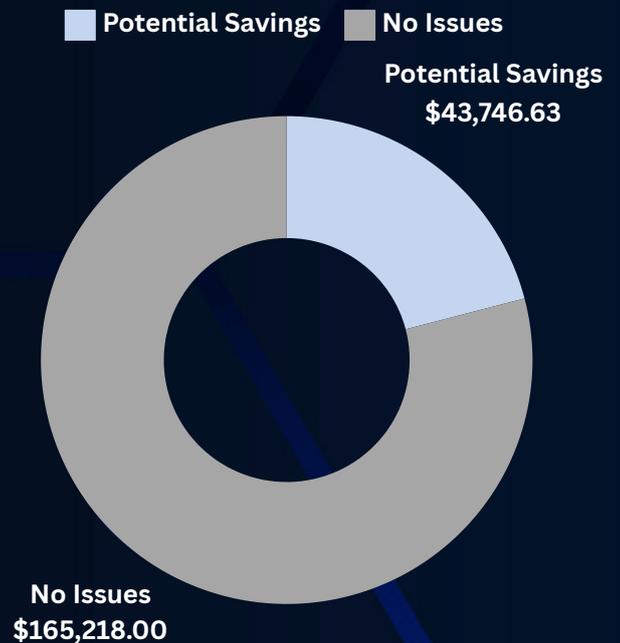

Auditing Consistency

All restoration companies' invoices are audited by identical standards, creating an unbiased and neutral invoice review process.

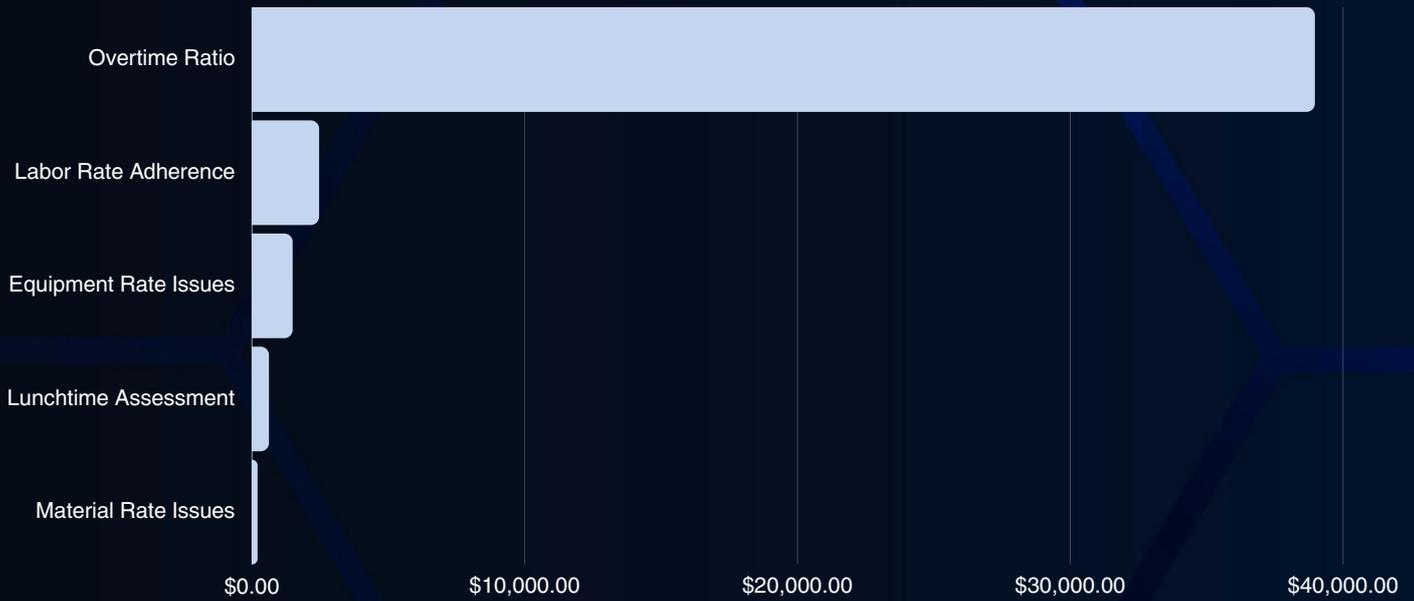

Cost Effective

Low-investment high return, ask us about our pricing options.
